English & French

Objective

To contune

About

I am a holistic technologist – I focus on viewing complex computer systems as a single entity. I am able to craft ingenious solutions using limited resources – solving problems that were formerly considered impossible.

Experience

- 2012 - 2015 **Poetica Ltd. - DevOps Engineer** London, UK
Design and implementation of scalable EC2 cloud provisioning and automation system for development. Managed migration to Softlayer for launch of public beta. Company has since been purchased by Condé Nast.
- 2011 **Superior Seating Hospitality - Migration Specialist** Toronto, Ontario
Migrated from a poorly managed and fragmented IT/support department to a more cost effective and stable solution.
- 1996 - 2010 **Highlight Investments Inc. - Co-Founder** North Vancouver, BC
Architect for the company's IT infrastructure as well as creation of a new form of stock market analysis. Database and network infrastructure responsible for collecting and archiving tens of thousands of stocks and derivatives data in real-time.

Education

- 2010–2013 **B.Tech - Bachelor of Technology** BCIT
Network Security & Administration
- 2007–2010 **Diploma - Computer Systems & Technology** BCIT
Data Communications and Inter-networking

Publications

- 2005 **Patent** US7813984 B2
System for determining modulated volume for a tradeable financial element.
- May 2004 **Volume Spikes & Index Reversals** The Technical Analyst
- June 2004 **Website for Traders** Stocks & Commodities
